

At Congress Middle, we offer a one-of-a-kind experience that blends the creativity of the arts with the power of cutting-edge technology. Our students thrive in a hands-on, project-based curriculum designed to inspire artistic expression while developing the skills needed for success in today's world. Through our STEAM disciplines, we not only nurture academic excellence but also spark curiosity and innovation.

In our state-of-the-art STEAM Innovations Lab, students have the opportunity to bring their ideas to life—whether it's designing and producing objects with 3D printers or programming robots to solve complex challenges using advanced robotics software. Plus, our Congress Medical Program introduces students to the fascinating world of healthcare and medical technology, preparing them for future careers in these essential fields.

*Join us and watch your child unlock their potential through creativity, technology, and real-world problem-solving. The future starts here at Congress Middle!*

### 1 Explore Electives Beyond Our Choice Programs

- Band
  - Chorus
  - Culinary Arts\*
  - Dance
  - Physical Education
  - 2-D Art
