The Institute for Regional Conservation

100 E. Linton Blvd. Ste. 302B Delray Beach, FL 33483

Phone: (305) 247-6547

A private non-profit organization is dedicated to the protection, restoration, and long-term management of biodiversity on a regional basis, and to the prevention of regional extinctions of rare plants, animals and ecosystems. Founded in 1984, we promote an innovative approach to conservation. We seek to protect - and restore - viable populations of all plant and animal species within a region by designing conservation strategies powered by rich, geographically-distributed data. Our approach adds critical value to traditional conservation strategies focused on charismatic animals or species with small global ranges. This work is especially important in regions of the world where rapid fragmentation of habitats has been experienced, or is expected. For more than two decades we have focused our field work in Florida and the Caribbean, but we are also engaged in high-level dialog on ecological restoration and biodiversity targets more broadly around the world.

Students from local and neighboring high schools are invited to join the group. After the beach cleanups the students gather for volleyball games and snacks. As the group grows they continue to look for other ways to expand their environmental preservation message.

Diagnosed with leukemia in 1991, Jay Feinberg was told he would need a bone marrow transplant to survive, but there was no matching donor for him in the registry. His loving and persistent family would not take "no" for an answer! They organized an international grassroots campaign to find his donor. Over 60,000 people were tested and joined the registry, providing matches for hundreds of other patients – but not Jay. As his health was failing, one last hopeful drive was held and the last person tested turned out to be Jay's match. He received a successful transplant, and to pay it forward, founded the Gift of Life Marrow Registry. Gift of Life has 285,000+ registered volunteer donors and 3,224 lives saved...and, so much more to do to help those suffering from Blood Cancer and other curable diseases like Sickle Cell disease. Individuals can join the registry anytime after their 18th birthday...and since you can stay in the registry until you are 61- High School seniors are very important.
