

Requirements for the purchase and storage of Isopropyl Alcohol Hand Sanitizer for Schools and Departments

This information is being provided by the Building Code Services Department

Isopropyl Alcohol Hand Sanitizer is highly flammable and its use in schools is regulated according to the following state requirements.

CLASSROOMS

- **Classrooms can use one 32 ounce (or 1.2 liter) max dispenser bottle at a time.**
- **Classrooms can store no more than one additional 32-ounce (or 1.2 liter) dispenser bottle at any one time.**

LARGE ASSEMBLY ROOMS (cafeteria, media center, gym, etc.)

- **Large assembly rooms can use two 32 ounce (or 1.2 liter) max dispenser bottles at a time.**
- **Dispenser bottles shall be separated not less than 4 feet from each other.**

CORRIDORS

- **No dispenser bottles shall be used or stored in corridors.**

SCHOOL STORAGE

Schools can store extra stock with the following conditions:

- **In schools without a fire protection sprinkler system, 120 gallons max can be stored in a designated flammable storage room or separately in one or more flammable storage cabinets.**
- **In schools with a fire protection sprinkler system, 240 gallons max can be stored in a designated flammable storage room or separately in one or more flammable storage cabinets.**
