

Welcome to SECME! Where dreams are engineered!

SECME is an engineering club where students create projects using recycled items in preparation for our SECME Olympiad held on March 11, 2023, at Santaluces High School. Our SECME Club is open to students in grades 6-8. Weekly meetings are held after school on campus each Wednesday from 3:30 to 5:15 pm. Students and their families are encouraged to participate in off-campus build workshops held throughout the year. The SECME Club Google Classroom code is 4cxorjl. Members should check Google Classroom regularly for updated club and meeting information. Students may pick up an application/permission form at student services or during the club meeting. Students need to make sure they have a reliable ride home at 5pm.
